designed to simplify.
built to empower

WEB SURVEYS AND FORMS.

FormXen is your solution to creating web based forms and surveys. From generating research and feedback to tracking information requests and event signups, FormXen provides you with a user friendly tool to develop, publish, and post online forms and surveys. Once you have published your forms, the application does the rest by tracking and summarizing responses and results as well as generating customized reports and exports of data.

RICH TEXT EDITOR.

FormXen includes a WYSIWYG (What you see is what you get) rich text editor for the user to use when creating forms and surveys. The "word processor like" editor formats text, creates tables, changes background and font colors, and uploads images. The user is able to add questions of multiple formats and preview the form just as it would appear when published.

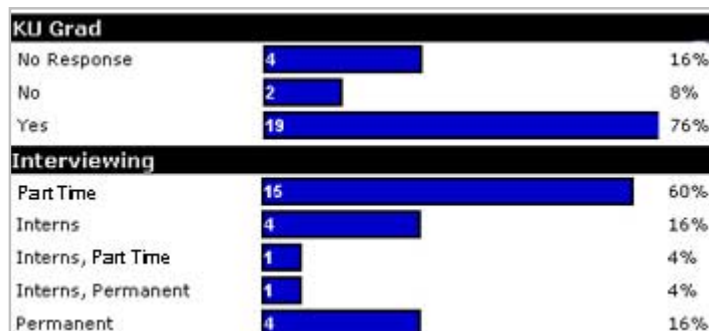

QUESTION TYPES.

Users are able to build forms with multiple question formats using: text boxes for short answer questions, text areas for long answer and comment type questions, checkboxes for multiple selection questions, and radio buttons and dropdowns for single select questions. The user is able to customize the layout of each question and even require the user to enter or select an answer.

RESULTS.

The application's built in validation ensures that you get results in the format that you need. From phone numbers and zip codes to

states and monetary values, you define the format and FormXen ensures you get the results. The application then generates reports on the results based on specific questions or a combination of questions and the answers received. processor, and PDF.

- SURVEYS
- RESEARCH GENERATION
- QUESTIONNAIRES
- WEB BASED PUBLISHING
- FEEDBACK FORMS
- ONLINE ACCESS
- CUSTOMIZED REPORTING

VISUALIZE:

Web based forms serve as the most cost effective solution to feedback, surveys, and research especially when they are sent directly to targeted groups or easily accessible through your website. What if you could create these forms, email them, and/or publish them on your site with no HTML or programming knowledge?

CUSTOMIZE:

You can have complete control over the look and layout of your forms and surveys and even use a template that exactly matches your website. With multiple question formats, a rich text editor, and graphical reporting; get the results you need with immediate ROI.

EXPERIENCE: **FORMXEN**
WEB FORM AND SURVEY GENERATION

FORMXEN INGENUITY

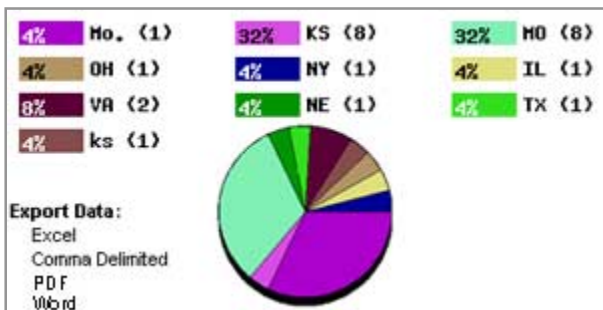

- User friendly WYSIWYG Rich Text survey and form builder.
- Textbox and text area question types for open ended questions.
- Checkbox, radio button, and dropdown question types for multiple choice questions.
- Require answers to be formatted in a pre-designated format.
- Specify minimum and maximum numerical values for specific answers.
- Completely customizable look and feel of each form and survey.
- Publish forms and surveys to web sites and emails.
- Email results of forms to designated address as they are completed by end users.
- View all responses for a survey or form at any time.
- Report and export results and data in multiple formats.

The Rich Text Editor helps the user build attractive forms with it's word processor like functionality. You can quickly and easily format text , create tables, add and update questions.

FORMXEN EFFECTS

- No HTML or programming knowledge required to create and publish forms.
- **Automatically validates answers to ensure comparable formats of results.**
- **Receive immediate email notification of form and survey results.**
- **Get the feedback and research information in the format that meets your needs.**
- **Connect forms and surveys directly to your website with the same look and feel.**
- **Create forms for event signups or even general website feedback.**
- **Summarize results for in-depth statistical analysis.**
- **Generate results that provide you with feedback from key individuals such as employees, students, parents, website users, and other individuals.**

FormXen allows users to create many different types of questions and add buttons to their forms for Email, Clear, Close, and Print.

FormXen's reporting allows you to generate reports on one or more questions in a survey. The data can then be exported to multiple formats such as Excel, PDF, and Word.

FORMXEN PERSPECTIVE

FormXen functions as a stand alone web based application to create forms and surveys that are publishable to other websites and applications or integrates seamlessly with other Academic Platform systems. It is a cost effective solution to generating feedback in the most efficient manner – online. The web based design allows for anytime-anywhere access while the reporting and exporting features provide you with tangible and usable results.
