

# NetKalendars

academic.allofe.net

more than meeting needs...  
exceeding calendar expectations

## CALENDARS.

NetKalendars goes far beyond the standards in online calendar creation for academic web sites. The system allows administrators to effortlessly create online calendars either as a stand-alone application or as an integral part of their existing web site. Whether you are a district needing to manage multiple school calendars or a single school needing just an academic, athletic, and lunch calendar, the tool is completely customizable to meet your specific needs.

## SECTIONS.

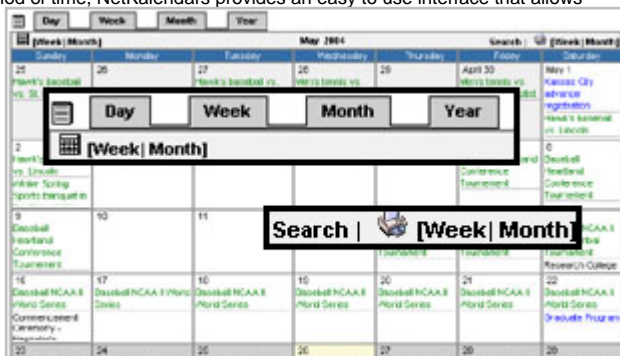

Does your institution have multiple departments, schools or divisions? If so, NetKalendars is the perfect solution to keep all of your events organized by those specific sections. Alternatively, your organization may list all events in an organized fashion through a single section. The choice is yours! NetKalendars gives you complete control over how your calendar information is displayed for the frequent visitors of your web site. With its advanced security structure, you never have to worry about the wrong people viewing restricted information.

## SECURITY.

NetKalendars' multi-level security allows you to create both public and private events. Calendar management is protected by user id and password authentication allowing you to designate who can view and manage each calendar and each event. Access to calendars and events can be assigned on a per user or per group basis, giving you the most flexibility and control over calendar management.

## RECURRENCE.

For events that recur over a period of time, NetKalendars provides an easy to use interface that allows users to create and manage one event and select its recurrence pattern. From basic weekly meetings to more complex events that occur on random dates, the system's recurrence functionality provides a simple interface that defines daily, weekly, monthly, yearly, and custom events.

- ACADEMIC CALENDARS
- CORPORATE CALENDARS
- MULTIPLE VIEWS
- EVENT SEARCHES
- EVENT CATEGORIZATION
- ONLINE ACCESS
- WEB SITE INTEGRATION

## VISUALIZE:

Managing multiple web based calendars from one centralized system with anytime and anywhere access. View calendar events by section such as an athletic calendar or an admissions calendar OR view all sections together for a complete academic calendar of all events.

## CUSTOMIZE:

Define how many calendars you need such as one for each school in a school district and then seamlessly integrate the calendars into your existing websites and intranets. Customize font and background colors of your events based on section and/or category to quickly locate events in the various calendar views.

WEB CALENDAR MANAGEMENT

## NETKALENDARS INGENUITY

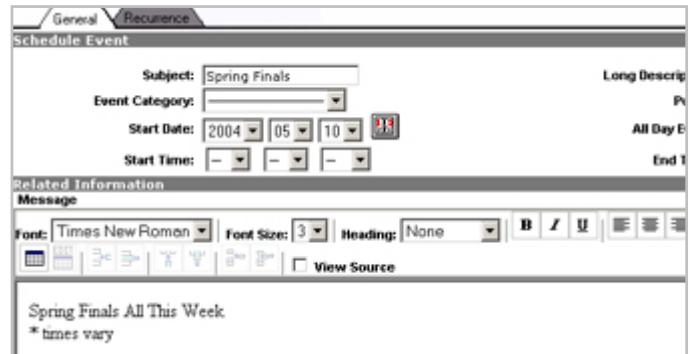

- Manages an unlimited number of calendars from one system.
- Posts calendars directly to your website.
- Displays calendar events in multiple formats.
- Categories events by colors that you can define.
- Supports separate calendars for athletics vs. admissions.
- Displays a main calendar that includes events from each individual calendar.
- Uses advanced security to give access to update data on a per-user basis.
- Flags private events that are only viewable by certain users.
- Includes advanced search options to search one calendar or across all calendars.
- Provides an easy to use event recurrence screen for users to create events that occur repeatedly over a period of time.

## NETKALENDARS EFFECTS

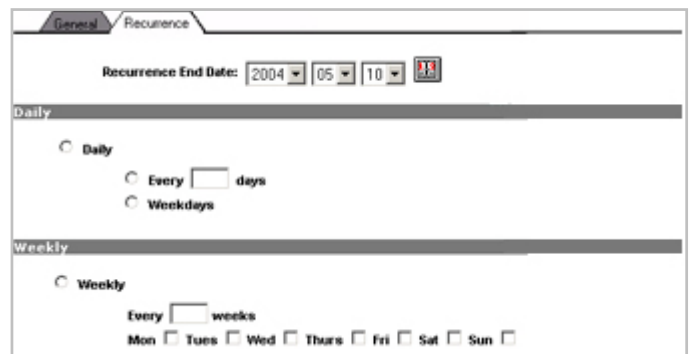

- Saves time by only having to schedule recurring events once.
- Simplifies finding particular events with the color-coding feature.
- Allows users to administer the calendar anytime and from anywhere.
- Provides a secure and user friendly interface for calendar management.
- Includes several views for a more customized look and feel.
- Allows you to include all relevant info with an event such as documents.
- Manages personnel by assigning them to events and checking availability.
- Keeps end users informed about your public events.
- Includes advanced viewing and printing functionality to meet all user preferences.

The calendar includes multiple views, searches, and print features. From a full month view to weekly and daily detailed views, NetKalendars has something that will meet all user preferences.

NetKalendars includes a Rich Text Editor for entering event information. This allows users to create attractive event details by using tables, colors, and formatting text.

The Recurrence screen allows users to create events that recur daily, weekly, monthly, yearly, or even just on custom dates.

## NETKALENDARS PERSPECTIVE

NetKalendars provides user friendly functionality to create and manage web based academic and organizational calendars. The application is customizable to integrate seamlessly with the look and feel of your existing web site and can even be used as a plug-in to our ContentM web content management system. NetKalendars is simply the ideal way to manage an unlimited number of calendars of events on your web site.
